

**SHRI VAISHNAV VIDHYAPEETH VISHWAVIDHYALAYA**  
**SHRI VAISHNAV INSTITUTE OF INFORMATION TECHNOLOGY**  
**DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**  
**MST [THEORY] EXAMINATION [OFFLINE], SESSION 2021-22**

Vision of the University

“To create an educational environment that engages deep intellectual, moral and spiritual stimulation, thereby nurturing leadership.”

Mission of the University

“To pioneer a 'mentoring' based education system with a culture of its own, rooted in Indian ethos and in tune with contemporary times;

To impart learning through understanding, knowledge enrichment, skill development and positive attitude formation;

To encourage innovative thinking with self discipline and social responsibility.”

**MST [THEORY] EXAMINATION [OFFLINE]**

**TIME: 01 Hour**  
**MAX MARKS: 20**

PROGRAM:--**B.Tech.**-----, BRANCH:- **CS**-----, SPECIALIZATION:- **All**-----

YEAR:-----**2nd**-----, SEMESTER:-----**IV**-----, SECTION:---**A to I**-----

COURSE-CODE:---**ML307**-----, COURSE-NAME:- **Environmental Mgmt. and Sustainability**--

**NOTE :-**1. Attempt all questions.

2. Each question carries equal marks.

| Q. No. | Question                                                                    | Max Marks | CO Mapped |
|--------|-----------------------------------------------------------------------------|-----------|-----------|
| Q.1    | Define air pollution and discuss its effect on human health.                | 4         |           |
| Q.2    | Discuss the various processes involved in municipal solid waste management. | 4         |           |
| Q.3    | Write short note on Greenhouse effect and the associated climate change.    | 4         |           |
| Q.4    | Write about the different goals of sustainable development.                 | 4         |           |
| Q.5    | Explain briefly the depletion ozone layer.                                  | 4         |           |

**COURSE OUTCOME:**

CO1- ...

CO2- ...

CO3- ...

## ML307

IV Semester Examination, May-June, 2022

B.C.A. (BDAI) / B.C.A. + M.C.A. (NB / BKNT) / B.Tech. / B.Tech. + M.Tech. / B.Tech. + M.B.A.

[All Braches CSE / IT]

## Environmental Management and Sustainability

Choice Based Credit System (CBCS)

Time: 3Hrs.

Maximum Marks: 60

Minimum Pass Marks: 24

Note: (1) Question paper consists of two Section (Section – A & B), attempt any three questions from Section –A and attempt all the questions from Section – B

### SECTION – A (Attempt any three)

- Q. 1 Identify three causes of soil pollution? Suggest 3 measures to be taken to control soil pollution. 12
- Q. 2 Discuss global warming and the greenhouse effect. 12
- Q. 3 Summarize the significance of Sustainable Development Goals. 12
- Q. 4 Point out the benefits of Environmental Impact Assessment. 12
- Q. 5 Society plays an important role in the conservation of the environment. Discuss. 12

### PART – B (All questions are compulsory)

- Q. 6 The Ganga originates from the Gangotri Glacier on the southern flank of the Himalayan Mountains. Global climate change is reducing the size of the glacier, lowering the water volume flowing downstream. Even though ten major tributaries add to the Ganga river system as it moves south, this does not add enough water to offset the decrease in water volume coming from the Gangotri Glacier. Therefore, as the glacier reduces in size, the amount of water available for use in the Ganga decreases, causing an increase in the concentration of pollutants in the river. 24

Contd...

This makes it more likely that the consumption of the river water will result in negative consequences. This is not the case with the Ganga river only. There are many rivers facing the issue of water pollution.

Water pollution has become a global crisis. The perennial threat of the water crisis is increasing because of uncontrolled and unbalanced development in the sectors such as industries and agriculture. According to the reports of NITI Aayog, 21 major Indian cities, including Delhi will completely run out of groundwater. There are many reasons behind the pollution of the river Ganga. The government is also taking measures to clean the Ganga river.

Now answer these questions:

1. List four reasons behind the pollution of Ganga.
2. Suggest three measures government should take to clean and protect the river.
3. Suppose you have been asked to raise awareness in your locality about rivers getting polluted and the need to control river pollution. Explain how you will be educating people about this issue. Briefly explain what steps you will be taking to raise the awareness?
